replacement bearings

In today's market, many VCR repairs are lost due to high cost, especially on low-end VCRs. Suburban Electronics has developed a replacement bearing for most capstan motors, which can reduce more than \$65.00 to the repairman. We can supply the replacement bearing complete with removal/replacement tool for approximately \$7.00 retail. (Bearing replacement time is usually 5 min. or less.) VCRs experiencing bearing failure in the capstan motor show the following symptoms:

- Vibrating Noise
- Slow in "Play" when hot
- Stops in "Play"
- Unable to rewind
- Choppy sound
- Loss of servo when hot
- Warm capstan motor IC chip
- Fits popular brands including Emerson, Fisher, Goldstar, Hitachi and Sanyo.

desoldering station

SEW-916D is solomon's top of the line service center and it will handle virtually all electronic repair and rework applications. The SEW-916D will simultaneously control temperature either of the two size of soldering iron and desoldering iron and desoldering handle,or control both soldering irons. The SEW-916D is based on the principle of vacuum absorption of the solder from PC board. Easy desoldering the tin by reversing the vacuum to positive air flow. There is a 2 position switch that shifts the control board from desolder to solder allowing the concurrent operation of 2 irons.

- Voltage: 110/120V AC or 220/240 V AC
- Power consumption: 50W
- Heater operating voltage: 24V AC
- Vacuum pump: -500mmHg 24V AC

This will highly regulate the air flow and the temperature and is available for QFP and SOP ICs. Both the welding and the descaling shall be conducted with the same nozzle. The auto removal of static electricity offers more safety to the elements and the operation, different ICs would be regulated to different temperatures.

- Auto cooling system
- Applicable for galvanized welding and removal of QFP and SOP ICs and it is applicable for telescopic hoses.
